

"I joined Littal's course "The people Analytics Journey", after I heard alot of her. Littal is such a professional and smart person, so even if you come with a good background, she can still be so relevant for the next step. Moreover, she is so generous and sharing her knowledge, its seems she realy works in her designation. Thanks Littal for this great course."

Keren Dadia Cohen
Head Of HR, Commtact Ltd.

Frequently Asked Questions

Is it theoretical or practical?

The course combines theoretical and practical contents. You will acquire analytical mindset that will enable you to support business questions with HR data. You'll learn the foundations, review case studies and tools, so hopefully, you'll apply some of it in your organization, in accordance with its maturity.

Do I need a certain software?

You don't need to have or to purchase in advance any software or tech solution. During the course you'll learn to distinguish between solutions, so eventually your voice will be heard better, in procurement decisions or in communication with your internal or external analytics provider.

Will it help my Career in the HR domain?

The future of work, and the future of HR, will be completely different – much more automated, technological, and data-driven. Expanding your skills via People Analytics mindset and practices will help you to save your future spot. It will also enable you to contribute more to your organization, which may lead to career opportunities and growth.

Why should my employer support it?

The course enables to understand how people processes are related to business results. People Analytics practices support this linkage. Your employer would like you to contribute more in improving the return on investment in people, and in developing data-driven approach to people processes, using up-to-date technologies and methodologies.

Who else chose Littal Shemer Haim for People Analytics training, mentoring and consulting?
